File handling

Q. Write a program to create a new file and write text into it.

```
#include <stdio.h>
```

```
int main()
```

```
{ FILE * fp;
```

```
  char text[100];
```

```
  fp = fopen("output.txt", "a");
```

```
  if (fp == NULL)
```

```
  { printf("Error opening file!");
```

```
    return 1;
```

```
  printf("Error opening file!");
```

```
  return 1;
```

```
}
```

```
printf("Enter text: ");
```

```
fgets(text, sizeof(text), stdin);
```

```
fputs(text, fp);
```

```
fclose(fp);
```

```
printf("file written successfully!");
```

```
return 0;
```

```
}
```

Q. Open an existing file and read its content character by character close the file.

```
#include <stdio.h>
```

```
int main()
```

```
{ FILE * fp;
```

```
  char ch;
```

```
  fp = fopen("output.txt", "r");
```

```
  if (fp == NULL)
```

```
  { printf("could not open the file.");
```

```

1  #include <stdio.h>
2
3  int main()
4  {
5      FILE *fp;
6      char ch;
7
8      fp = fopen("sample.txt", "r");
9
10     if (fp == NULL)
11     {
12         printf("Could not open the file.\n");
13         return 1;
14     }
15
16     printf("File content:\n");
17     while ((ch = fgetc(fp)) != EOF)
18     {
19         printf("%c", ch);
20     }
21
22     fclose(fp);
23
24     return 0;
25 }
26

```

```

PS C:\Users\sanch\OneDrive\Desktop\c programming> cd 'c:\Users\s
anch\OneDrive\Desktop\c programming\exp_8.c\output'
PS C:\Users\sanch\OneDrive\Desktop\c programming\exp_8.c\output>
& .\exp2.exe
File content:
Hello Everyone
I'm Sanchita
Welcome to C Programming
PS C:\Users\sanch\OneDrive\Desktop\c programming\exp_8.c\output>

```

 Compilation successful.

5. Open an existing file and read its content character by character and then close the file.

```
#include <stdio.h>
```

```
int main()
```

```
{ FILE * fp;
```

```
  char ch;
```

```
  fp = fopen("output.txt", "r");
```

```
  if (fp == NULL)
```

```
  { printf("Could not open the file.\n");
```

```
    return 1;
```

```
}
```

```
  printf("File content: \n");
```

```
while((ch = fgetc(fp)) != EOF)
{
    printf("x.c", ch);
}
fclose(fp);
return 0;
}
```

```

1  #include <stdio.h>
2
3  int main()
4  {
5      FILE *fp;
6      char line[200];
7
8      fp = fopen("sample.txt", "r");
9
10     if (fp == NULL)
11     {
12         printf("Could not open the file.\n");
13         return 1;
14     }
15
16     printf("File content:\n");
17     while (fgets(line, sizeof(line), fp) != NULL)
18     {
19         printf("%s", line);
20     }
21
22     fclose(fp);
23
24     return 0;
25 }
26

```

```

PS C:\Users\sanchi\OneDrive\Desktop\c programming> cd C:\Users\s
anch\OneDrive\Desktop\c programming\exp_8.c\output'
PS C:\Users\sanchi\OneDrive\Desktop\c programming\exp_8.c\output>
& .\exp3.exe'
File content:
Hello Everyone
I'm Sanchita
Welcome to C Programming
PS C:\Users\sanchi\OneDrive\Desktop\c programming\exp_8.c\output>

```

 Compilation successful.

3
Q. Open a file and read its content line by line and display each line on the console

```
#include <stdio.h>
int main ()
{ FILE * fp;
  char line[200];
  fp = fopen("output.txt", "r");
  if (fp == NULL)
  { printf("could not open the file.\n");
    return 1;
  }
  printf("File Content:\n");
  while (fgets(line, sizeof(line), fp) != NULL)
  { printf("%s", line);
  }
  fclose fclose(fp);
  return 0;
}
```
